Dear Prospective Donor,

Thank you for considering a donation to Partners for Rural Health in the Dominican Republic. We are a nonprofit 501c3 organization which makes biannual medical outreach trips to the northern province of Dominican Republic. During our medical mission, we will treat nearly 1,500 patients who desperately need basic health care. The following is a general needs list. Whatever you could donate would be greatly appreciate.

Also, cash donations are needed to provide; child, adult and prenatal vitamins; cardiac and diabetic medications and supplies, antibiotics, gynecological medications, and general laboratory supplies. We use cash to purchase wholesale drugs.

Again, thank you for your generous support and kind consideration to help us help those in need.

Sincerely,
Whitney Lutz, RN, CPNP, President,
Partners for Rural Health in the Dominican Republic
